

June 14, 2000

Mr. Goldenberg,

I am writing to let you know how pleased we are with your "Magic Windows". As you know, we replaced all our house windows in April of this year. With my background as a former Electrical Mechanical Engineering (EME) Officer in the Canadian Armed Forces. I researched the market to determine what were the advantages and disadvantages of different manufacturers windows.

After visiting two showrooms in the Barrie area, then visiting your showroom in Weston and comparing all three products it was quite evident that in my opinion your "Magic Window" is a superior product. My wife is really pleased with the ease of operation, opening and closing the window, and the action of the screen opening and closing. I am also impressed with the secure and easy locking handles and the quality of the workmanship. I would certainly recommend your "Magic Windows" to anyone who is contemplating replacing the windows in their house.

Thank you again Sol for taking the time, when my wife and I visited your showroom, to explain the construction, workmanship and quality of material that went into your product. With this information it was an easy choice to select "Magic Windows" over other windows for our house upgrade.

We were also impressed with the tradesmen who did the actual installation of the windows. They were very professional and their work was of a high standard. It was quite evident that this was not their first installation.

Sincerely,

W. Leslie
